About me

Computer engineer with more than 18 years of experience specialized in Microsoft environments and cloud solutions. Throughout my career, I have led complex projects, implementing solutions that optimize operations and improve efficiency. My approach is based on best practices, ensuring security and optimal performance in all deployments. In addition to my technical experience, my computer engineering training has developed essential skills such as teamwork, the ability to follow instructions, and minimizing errors in all tasks. My versatility is not only limited to technology, but extends to effective practical problem solving in various fields. I am committed to delivering accurate and efficient results, working collaboratively with colleagues to achieve common goals. I constantly seek opportunities to grow and learn, adapting to technological trends and emerging challenges. My goal is to contribute significantly to the success of any project I am involved in, merging my technical skills with a practical and results-oriented mindset.
